Experience

Winman Software

Jan 2026 - Present

Software Engineer Intern

- Working on web scraping and automation in Winman CA ERP and Winman GST.
- Implement automation workflows to fetch and integrate data from external portals and handle production tickets following a structured SDLC process.
- Involved in coding-related R&D to explore improvements and new approaches.

Sasken Technologies Ltd.

June 2025 – August 2025

Intern

- Developed a full-stack feedback management system using React and Spring Boot to streamline training evaluation processes.
- Developed a dynamic form builder supporting 4+ question types and designed REST APIs and database schema to manage structured feedback data and reporting.
- Integrated a Python-based sentiment analysis microservice to extract insights from textual feedback responses.

Education

Canara Engineering College

2022 – 2026

BE in Artificial Intelligence and Machine Learning — CGPA: 8.79

Mangaluru, Karnataka

Jawahar Navodaya Vidyalaya, UttaraKannada

2020 – 2022

Class XII - CBSE — Percentage: 81.83%

Mundgod, Karnataka

Jawahar Navodaya Vidyalaya, UttaraKannada

2020

Class X - CBSE — Percentage: 89.33%

Mundgod, Karnataka

Projects

RAG-based Chatbot for Academic Assistance | ReactJS, Node.js, Flask, LangChain, FAISS, MongoDB, Nemotron Nano 12B

- Built a knowledge retrieval system using RAG architecture to provide context-aware academic assistance.
- Implemented document indexing and semantic search using FAISS and MongoDB.
- Integrated frontend and backend microservices to support real-time query processing.

AI-Based Road Inspection System | ReactJS, Flask, YOLOv11x, Roboflow

- Implemented a real-time pothole detection system using YOLOv11x, trained with annotated datasets via Roboflow.
- Designed a responsive interface to allow image uploads and generate real-time inspection results.
- Developed to support municipal road maintenance efforts and enhance public safety.

EvalEase – Training Feedback Portal | React, Spring Boot, Flask, MySQL, Python

- Developed a full-stack portal that automated post-training feedback collection and analysis for admins.
- Developed a dynamic form builder with sentiment analysis API, increasing survey efficiency.
- Integrated Spring Boot backend with MySQL for persistent, scalable data management.

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL, C

Machine Learning & AI: Machine Learning, Natural Language Processing (NLP), Retrieval Augmented Generation (RAG)

Web Technologies: HTML, CSS, React.js, flask

Databases: MySQL, MongoDB

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management System (DBMS)

Certifications

Infosys Springboard Internship

IBM SkillsBuild Project Based Learning Program – Decoding Data: Insights and Impact through Analytics (CSRBOX)

Java with DSA - PW Skills

Activities

- Winner – PRIMED: The Placement Hackathon (June 2025), organized by IEEE Mangalore Sub-Section at AJIET, Mangaluru
- Published a patent titled “AI-Based Road Inspection System”.
- Lead as Class Representative and Project Team Lead, demonstrating leadership, communication, and organizational skills.
